

IFSEC Awards nominate AMG Systems as New Exporter of the Year 2005

10 May 2005 - AMG Systems Ltd has been selected as a finalist in the New Exporter of the Year category for the IFSEC Security Industry Innovation Awards, 2005. The prestigious award, which is widely accepted as the premier accolade for companies serving the security industry, recognises the significant strides the company has made over the last few years with the introduction of new products, culminating in a tripling of export sales last year.

AMG Systems is one of the UK's leading providers of fibre optic transmission equipment designed for CCTV surveillance operations. The company's products are installed in applications ranging from prison security to entertainment complexes and town centres, and in many transport-related environments, including road and rail links, ports and airports. The company has built on its excellent UK performance with a concerted effort to break into foreign markets. The result has been remarkable success as AMG's technological leadership has been recognised across Europe, Asia and the Far East.

The majority of projects outside the UK have been won through partnership with local system integrators, many of which were customers. Others have been contributed by overseas projects won by UK-based systems integrators that have worked with AMG in the UK. The volume of work won through referral and repeat-business is particularly high.

A significant factor in AMG's export and domestic success has been the introduction of the Guardian-Lite™ 2700 products in 2004, tripling export and almost doubling UK sales. Key export markets are the Middle East, Eastern Europe, and the Far East.

The awards will take place on the 16 May 2005 at the Hilton Metropole Hotel, Birmingham.

About AMG Systems

AMG Systems Ltd is the world's leading provider of fibre optic transmission equipment designed for CCTV surveillance operations. Carrying real-time, full-bandwidth video, audio and data signals, the company's equipment is installed on highways, tunnels, rail links, ports, airports and buildings around the globe to enhance safety and security for all users. As well as providing the most comprehensive and innovative range available in the market today, AMG's expertise is also exploited to produce high-quality custom fibre-optic video, audio and data transmission products for many multi-national companies. The company is located at Stratton Business Park, Biggleswade, Bedfordshire, SG18 8QB. Further details can be found at www.amgsystems.co.uk.
