CELEBRATION FOR AMG AS IT SCOOPS MAJOR ACCOLADE AT PRESTIGIOUS 2005 SECURITY EXCELLENCE AWARDS

Leading CCTV solutions company beats off stiff competition to win International Achievement Award at Industry Oscars

12 October 2005 - AMG Systems, the leading manufacturer and supplier of optical fibre based transmission solutions for CCTV, has beaten off stiff competition from 3 other shortlisted companies to win the coveted 'International Achievement Award' at this year's Security Excellence Awards. This is the first time the company has entered the Awards and the win is being heralded by AMG as excellent recognition of the company's recent record-breaking run in securing contracts around the World.

In its submission for the award AMG cited recent projects in Athens to help the city prepare for the 2004 Olympic Games as well as initiatives in the Middle East and the Far East. These have helped the company achieve widespread international recognition for the quality of its work in the field of CCTV solutions.

"Everyone at AMG is thrilled to win the International Achievement Award", commented Dr Alan Hayes, Managing Director of AMG. "We were delighted to be shortlisted but, being our first ever entry to the Security Excellence Awards, were unsure of how well we'd do in the final against such strong and successful, established competition.

"In recognising the breadth and quality of our work, the judges have rewarded a truly tremendous effort across all of our teams; from sales, to manufacturing, to engineering. I am enormously proud of everyone at AMG Systems and I hope this award will help us to continue to expand both the breadth and value of our work across the globe. It reinforces the point that we can provide unique cost benefits to the customer with our system design and comprehensive range of products, not only in the UK local market but, more significantly, overseas".

AMG Systems is one of the UK's leading providers of fibre optic transmissions equipment designed for CCTV surveillance operations. Founded in 1990 by Dr Alan Hayes, the company has used its considerable success in the UK market to break into and support foreign markets. Key to the AMG export drive was the appointment of a dedicated Sales & Marketing Director who has overseen a number of initiatives. AMG initiated a number of e-based marketing activities, participated in exhibitions in the Middle East for the first time and restructured its sales organisation. AMG has also launched a dedicated interactive website to address the global CCTV audience.

About AMG Systems

AMG Systems Ltd is the world's leading provider of fibre optic transmission equipment designed for CCTV surveillance operations. Carrying real-time, full-bandwidth video, audio and data signals, the company's equipment is installed on highways, tunnels, rail links, ports, airports and buildings around the globe to enhance safety and security for all users. As well as providing the most comprehensive and innovative range available in the market today, AMG's expertise is also exploited to produce high-quality custom fibre-optic video, audio and data transmission products for many multi-national companies. The company is located at Stratton Business Park, Biggleswade, Bedfordshire, SG18 8QB. Further details can be found at www.amgsystems.co.uk.
