## AMG Systems Expands into India

### New Business Development Manager takes responsibility for growing Indian Market

**May 1 2008:** AMG Systems Ltd. announces that Gurpreet S. Basra has joined as Business Development Manager for India. Gurpreet Basra has an electronics engineering background and joins AMG Systems from a position in the UAE as Head of Projects, Intelligent Traffic Solutions at Scientech Siemens in Dubai. Prior to this, Gurpreet has gained extensive experience working as Head of Projects on highway traffic management systems in India. He has also worked with Compsis (Brazil) and Philips India. Gurpreet's distinguished international career has now taken him back to his native India where he will be running AMG's operation out of New Delhi.

Founder and MD of AMG Systems Alan Hayes says, "AMG has seen the market in India grow rapidly over the past few years. This new position as Business Development Manager strongly reflects our continued success and follows our recent appointment of a Sales Manager in the Middle East. With his excellent know how on intelligent traffic management systems I am particularly delighted that we have employed Gurpreet and I am convinced that his in-depth knowledge of the Indian market will be an asset to the continued growth of AMG's business".

Gurpreet Basra comments, "AMG offers a unique service to its clients by designing fibre-optic solutions for transport management systems which can incorporate true dual redundant optical systems. With the acclaimed Guardian-Lite™ 3700 system already implemented in a number of Indian Traffic Management projects the company has an excellent position to grow its market share within the entire spectrum for security and surveillance application of CCTV over the next few years. I am therefore very much looking forward to promoting AMG's future proof intelligent solutions that always incorporates the latest developments in security software and hardware devices".

Gurpreet Basra will be available for appointments and interviews during IFSEC on May 12 -13 2008 only.

AMG Systems will be exhibiting at IFSEC in **Hall 19 Stand 18126** where the company's new Skywave™ range of analogue and digital wireless transmission products will be launched.

### About AMG Systems

AMG Systems Ltd is one of the world's leading providers of video and communication transmission solutions designed for CCTV surveillance operations in the transportation and security sectors. AMG operate all over Europe as well as internationally. AMG differentiates itself significantly from other manufacturers by offering benefits such as drop and insert technology, and dual optical redundancy and manageability within an uncompressed transmission system. As a result AMG has been very successful in winning large, significant projects throughout the world. Projects include supplying the transmission system for the UK's NRTS project, using the innovative Guardian-Lite™ 3700 system. AMG also provided the transmission system for the security and surveillance of the Museum of Islamic Art in Doha, Qatar. In addition to this, AMG have completed projects for Airports, Rail, Ports, Industrial and commercial sites, sports and leisure facilities, Town and City centres, Military, Universities and hospitals.
