## AMG Launches New Range of Analogue and Digital Wireless Transmission Products at IFSEC 2008

**Skywave™ product series offer transmission distances up to 10km and are suitable for global use.**

**April 29 2008:** AMG Systems Ltd. announces that it will be launch a new range of analogue and digital wireless transmission products at IFSEC 2008. Today's announcement follows AMG's breakthrough in spring 2006, when it launched the AMG 3700 series, the world's first fibre optic transmission system to integrate Ethernet with high quality uncompressed video.

Skywave™ will be available for both single and multi-camera systems. The product series can transmit video, RS485 data, un-directional audio and alarm contacts.

In connection with the announcement today, founder and MD of AMG Systems Alan Hayes says, "We have found an increasing requirement for wireless transmission capabilities particularly in the transportation sector where there is an increased use of wireless CCTV cameras for certain applications. I do however, also see security applications where wireless technology will fit in".

With its large international audience IFSEC has proved the ideal place for AMG to launch new products over the past few years. AMG will be showcasing Skywave™ in **Hall 19, Stand number 18126** where visitors will be able to see a live demo.

### Skywave™ at a glance:

- Enables wireless connection of CCTV cameras to monitoring and recording equipment
- Licence exempt operation in the 5.8GHz band (compliant with R&TTE directive)
- 6 Channels (3 non interfering), switch selectable
- Channel indication, 7 segment display
- Signal strength meter (on receiver)
- 12V dc operation (9V to 28V input range)
- IP67 weatherproof enclosures suitable for flat surface or pole mounting
- Digital (alarm) channel option
- Audio channel, or second alarm channel option
- Short range patch antenna included (1Km range)
- Optional antennas available for specialist applications and extended range up to 3km.

### About AMG Systems

AMG Systems Ltd is one of the world's leading providers of fibre optic transmission equipment designed for CCTV surveillance operations in the transportation and security sectors. Carrying real-time, full-bandwidth video, audio and data signals, the company's equipment is installed on highways, tunnels, rail links, ports, airports and buildings around the globe to enhance safety and security for all users. As well as providing the most comprehensive and innovative range available in the market today, AMG's expertise is also exploited to produce high-quality custom fibre-optic video, audio and data transmission products for many multi-national companies. In 2005 AMG Systems won the Security Excellence Award for Best International Achievement citing, among others, the Traffic Management Systems delivered for the Athens Olympics. Recently, the company won the contract to supply the transmission system for the UK's NRTS Project, using the innovative Guardian-Lite™ 3700 system.
